

Just Grow It Matured Compost

Just Grow It Fact Sheet (2)

About Just Grow It Matured Compost

Just Grow It Matured Compost added to soils, provides improvements in,

- Organic matter levels which acts as a supply of a broad range of base elements and nutrients;
- The long term micro supply of these elements to plants and soil organisms;
- Soil humus levels which provides both an excellent substrate for plant growth, and reduces potential leaching and loss of soil nutrients;
- The physical properties of soil, including its structure and friability.
- The soils microbial environment which assists in the plants ability to access both natural and added fertilisers
- Soil moisture retention and availability.

α Note: Just Grow It Matured Compost is produced using a controlled batch composting technique, as prescribed by the Australian standards for composting (AS4454). Refer to Just Grow It Fact Sheet No. 1 - "Producing Matured Compost". This process converts a balanced mix of organic compounds and green based materials into a rich, dark coloured, soil additive.

Using Just Grow It Matured Compost

Just Grow It Matured Compost can be used in a wide range of soil applications, including landscaping, vegetable gardens, new garden development, garden rejuvenation, and horticulture.

Use Just Grow It Matured Compost as a mulch or cover in annual beds and vegetables gardens. Add it to lawns and garden beds to make the soil more friable and to improve organic matter levels and soil microbial activity. As a soil conditioner, dig it into clay or sandy soils to improve the soil structure and therefore the plant environment. Add to potting mix (10%) for improved growth of plants and seedlings

Typical analysis

PH (in water)	7.0 - 7.5	Organic Matter	38.0%
Total Organic Carbon	26%	Total Nitrogen	1.1%
Total Phosphorus	0.66%	Potassium	3.0mg/g
Calcium	64.5mg/g	Sulphur	19.5mg/g
Magnesium	6.75mg/g	Iron	3.1mg/g
Carbon:Nitrogen Ratio	<23	Moisture	>40%

Customer Information

This mixture is produced from natural materials and contains a variety of living organisms. We recommend you observe the old garden adage: *"Always wash your hands after working in the garden"*
